DECEMBER MEETING *Membership*

Submitted by: Tim Meeker

DATE: MONDAY, December 17th, 2007

LOCATION: Quality Inn & Suites
2969 Cahill Main
Madison, WI 53711

TIME: Social Gathering 5:00 to 6:00 p.m.
Dinner 6:00 p.m.
Program Presentation 6:45 to 7:45 p.m.

TOPIC: State of Wisconsin
Building Code Changes

The State of Wisconsin has approved changes to the current building code that will influence architects, engineers, suppliers, contractors and owners. These changes are proposed to go into affect on March 1st, 2007. This program will review these changes as they relate to our industry.

SPEAKER: Randy Dahmen, State of Wisconsin
Commercial Building Code Inspector,
Code Consultant and Plan Reviewer

Mr. Dahmen is an Advanced Engineering consultant with the State of Wisconsin Department of Commerce, Division of Safety and Buildings. His areas of expertise include the HVAC and Energy Conservation Chapters of the Wisconsin Enrolled Commercial Building Code. Mr. Dahmen is involved with the State of Wisconsin HVAC Contractor Registration Program, HVAC Qualifier Certification Program and training programs on the use of the HVAC and Energy Conservation Chapters of the Commercial Building Codes.

RSVP: Please RSVP (email) to Tim Meeker at JDR Engineering: meeker@jdreng.com. You can also call at (608) 277-1728, ext 105. Please RSVP no later than

5:00 p.m. Wednesday December 12th.

(See meeting info on next page)

PRESIDENTS MESSAGE

Submitted By: Gene Nelson

The end of year is a great time to celebrate our successes and reflect on where we've been and where we're going. At this month's meeting we wish to thank all of those who have served our chapter especially our "Past Presidents". We are now in our 45th year as a chapter. Our History committee would appreciate some highlights of past years or insights on how our industry has changed from our previous officers. We will also have a visit from our regional History chair, our own Jeff Boldt.

Looking forward, this month's meeting will highlight the upcoming changes to the Wisconsin Building Code. Also if anyone is planning to attend the Exposition in New York in January, I have several complimentary show registration tickets. See me at the meeting or send me an e-mail. These will be distributed on a first come/first serve basis.

Hope to see you December 17th,

Gene Nelson

2007-08 Madison ASHRAE Chapter President

MEETING MINUTES

Submitted By: Matt Heil

The minutes from the Madison General Meeting, Board of Governors meeting and treasurers report for November have been issued and posted on the Madison Chapter website. Please refer to them at the respective link:

[Madison General Minutes 2007-11-12](#)

[Madison BOG Minutes 2007-11-14](#)

[Madison Treasurer's Report 10-07](#)

If you have trouble, contact me directly at mheil@henneman.com. Thank you.

DECEMBER MEETING

Con't

Please provide your choice of dinner with your RSVP:

Dinner Choices:

Chicken Marsala

Chicken breast with mushrooms and garlic in a creamy Marsala wine sauce served with parmesan and polenta potatoes.

Roast Loin of Pork

Slow roasted pork with pan gravy served with garlic mashed potatoes.

Both dinners include garden salad, vegetables and bread, coffee and milk

Please let us know if you request a vegetarian meal, as arrangements will be provided.

Current local Members and Students may attend at no cost. The cost for non-members and delinquent paying members is \$30 for the dinner, tour and presentation. This can be paid at the door. Please make checks payable to Madison ASHRAE Chapter.

The Madison Chapter "No Show" Policy: In an effort to control meeting costs, members who fail to show and fail to chance by NOON FRIDAY the week before will be asked to contribute \$30 to recover the meal costs incurred by the Chapter. Checks are to be made out to Madison ASHRAE Chapter and mailed to: Robb Stone, c/o JDR Engineering, 2939 S. Fish Hatchery Road, Suite 100, Madison, WI 53711.

New ASHRAE Magazine – Free Subscription:

Do You Know Someone Who Should Read High Performing Buildings?

Do you have a colleague or client who is an architect, building owner, facility manager, or design/build contractor? They can go to www.HPBmagazine.org/subscribe to subscribe to the print edition, at no cost, and learn how buildings can achieve energy, economic, and environmental performance that is substantially better than standard practice.

Thanks!

Bill W.

US Green Building Council

Submitted By: Sharon Gould

A new Web site launched by the U.S. Green Building Council (USGBC) gives students, parents, teachers, school administrators, elected officials and community members a new resource in the effort to ensure a future of green schools for every child within a generation.

“The new site, Build Green Schools (www.buildgreenschools.org), will be a vital tool for the grassroots green schools movement, helping the site’s visitors to promote healthy, nurturing, environmentally friendly schools in their own communities,” noted Rick Fedrizzi, President and CEO, U.S. Green Building Council.

Build Green Schools is filled with facts on the benefits and costs of green schools, including the ways green schools foster learning, decrease student and teacher absenteeism from respiratory and other illnesses, reduce energy and water bills, and provide models for teaching the world’s future leaders about sustainability to benefit communities for generations to come. It is complete with profiles of schools that have already gone green, examples of policies governments and school districts have instituted to ensure future schools are green, an extensive list of resources and links, and even a social networking site for visitors to share their experiences, best practices, and creative ideas.

Green schools have a superior indoor environment, with clean, fresh air, free of dangerous chemicals from everyday products like carpets, paints and cleaning materials. They make use of as much natural daylight as possible, maximizing students’ ability to concentrate and stay physically and emotionally healthy while at the same time dramatically reducing energy costs and greenhouse gas emissions. On average, green schools use 33% less energy and 32% less water than conventional schools, which would bring the U.S. closer to reducing reliance on imported energy.

Green schools’ better lighting, temperature control, ventilation and indoor air quality contribute to reduced asthma, colds, flu and absenteeism, helping improve learning, test scores and lifetime student earnings. Greening all school construction would also create more than 2,000 new jobs each year from increased use of energy-efficient technologies. And green schools boost morale and improve teacher retention.

The USGBC’s LEED® (Leadership in Energy and Environmental Design) for Schools green rating system provides greenbuilding guidelines and offers third-party verification to ensure schools’ stakeholders that their buildings incorporate the best in science, design and technology to make their schools truly green.

Visit buildgreenschools.org to find out how you can be involved with this remarkable campaign.

Historian

Submitted By: Fran Scholl

Interesting tidbits about our membership:

We have 16 members that are over 70,

Birthdays from 1916 thru 1936.

(It would be fun to hear some of their impressions about early design compared to today. Any member over 70 who would be so kind as to call me to discuss would be greatly appreciated. **Call Fran Scholl at 608-236-1164.**

- o 21 of the assigned members are life or retired members.
 - o 41 of the assigned members are under 30.
 - o 16 of the assigned members are females.
- (Data is taken from 293 total assigned members)
